- Team leadership and training
- Graphic design, company identity and brand development
- User interfaces planning and development

Interested in projects related to:

- Platforms with long scale projections
- Gaming industry
- Testing automation
- Team leadership and management
- Platform design
- Project consultant

Development specialist with experience in evaluating the multiple stages of a project's life cycle. I am interested in personal development, in leading programming teams, in the implementation of good development practices and project construction.

I dedicate my free time to produce my personal YouTube channel with my family about psychology, play and practice music and read

and learn other aspects of personal development. I consider myself a creative, principled, responsible, and collaborative person, with wide abilities to face new challenges and manage complex projects.

Tenant Evaluation LLC

Ingeniero Senior de Automatización de Aseguramiento de Calidad

agosto de 2026 - septiembre de 2026 (2 meses)

Medellín

As a Senior QA, I contribute to building and maturing quality assurance processes by combining manual testing, process improvement, and automation initiatives.

Key responsibilities:

- Defined and standardized QA processes for identifying, planning, and tracking testing activities.
- Performed manual and functional testing to validate new features, enhancements, and bug fixes.
- Identified, documented, and reported software defects following QA best practices.
- Developed automation prototypes to streamline repetitive tasks and support the team's test automation strategy.
- Collaborated closely with Product and Development teams to ensure quality requirements were addressed throughout the software development lifecycle.
- Contributed to establishing QA standards, guidelines, and best practices across the engineering team.

zinc.tech

Especialista Senior en Aseguramiento de la Calidad de Software

abril de 2025 - agosto de 2026 (1 año 5 meses)

Medellín

Took ownership of an existing QA automation project, conducting a full viability and extensibility assessment before architecting and delivering a comprehensive automation ecosystem from the ground up.

- Evaluated the existing automation project for viability and extensibility, defining the technical roadmap for a scalable solution.
- Architected and developed a complete test automation suite split into two strategic tracks: a Data-Driven Testing track powered by pre-existing datasets, and a General QA track for end-to-end functional validation.
- Configured AI agents with tailored documentation and guidelines to execute specific testing and development tasks, streamlining team workflows.
- Built an automation control dashboard enabling on-demand execution of the full test suite, real-time result monitoring, and comprehensive report generation to assess system health.
- Designed and implemented a dynamic data generation engine capable of producing large-scale datasets, integrated with the automation suite for bulk data loading into the platform.
- Collaborated on internal system analysis, identifying defects across processes and data layers, and delivering targeted fixes to ensure reliable automated test execution.
- Full technology stack: TypeScript, Vue.js (dashboard and visual interfaces), Express/Node.js (backend services).

Gorilla Logic

FullStack Web Developer

junio de 2023 - noviembre de 2025 (2 años 6 meses)

Medellín, Antioquia, Colombia

Cigo Tracker

Full-stack Developer

noviembre de 2021 - noviembre de 2022 (1 año 1 mes)
